ABOUT US

APEX CARE TECHNOLOGIES is the fastest growing manufacturer and Supplier firm specialized in matchless quality of **FIRE, SAFETY, WELDING** and **HARDWARE**

Products. Since its inception in the year 2022.

We are one of the most promising Manufacturer and Supplier firm dealing in unparalleled range of FIRE, SAFETY, **WELDING** and **HARDWARE** Products. Our products offerings has become most favorable for a huge clients due to good quality and most competitive prices which we offer from strategic, planning to product development and marketing management, we consider no phase as an unbeatable challenge. And, this have become possible due to the founding principles of integrity along with the dedication of our people.

Moreover, we take pride of the technological adaptation of our team members. Our highly skilled team members utilize the technological aid to prepare themselves for the toughest business environments.

OUR TEAM **SUPPORTING SAFETY,** **HEALTHY LIFESTYLE**

We are blessed with a dedicated and hardworking team of people who work as their priority and work diligently to meet the requirements of the customers.

We have a team of 16 Members working round the clock to provide best products and services to our clients.

OUR MISSION & VISION **SPREADING SAFETY &** **HAPPINESS**

0% Fire & Safety Accident in the industries so that no precious life is lost.

Our mission of sustainable growth is strengthened by our efforts to seek new challenge.

OUR NETWORK

We have all India network of Business Associates for supplying bulk materials to industries.

OUR INFRASTRUCTURE

We have our own in-house office and 2 floor warehouse at Cuddalore, TamilNadu.

WHY US

A fact to be accepted is that there are a lot of market plans and factors that keep us much ahead of competition, these facts are mentioned below.

- Superior quality
- Value for money
- Within time deliveries
- State-of-art infrastructure

The expertise and experience of "**Mrs. N.Selvarani B.Pharm.,**" "**K.Ajithkumar - ME., (SAFETY)**" in this business domain is unmatched. His motivated guidance equips us to deal with the evolving client needs with utmost professionalism.

Addressing the challenges faced by our global community today requires persistence, creativity and a child-like curiosity.

We're on it.

Gas Detection System Survey

Each industry and each application within has its own requirements, challenges and legal regulations. A gas detection system that fits exactly to your site won't fit to another one. This is why we don't sell fixed gas monitoring solution off-the-peg. We start by talking about your specific requirements that have to be considered. In this step-by-step-process you can trust the vast experience and know-how of our experts. They will design a gas detection system for you that is neither too small nor too big, but ever reliable.

SCBA

Timely service & maintenance are necessary for SCBA sets for timely & effective use in case of emergency. We provide maintenance such as refill, Hydro testing, Contents check by weight, content check by pressure, Valve renewal, Valve repair, external maintenance.

Gas Detection Calibration

CALIBRATION OF PORTABLE GAS DETECTORS AND

FIXED GAS SYSTEMS ON SITE

- Calibration and certification.
- Spares supply and repair.
- Extensive inventory of calibration gas cylinders for on-board testing.

Road Safety & Traffic Products

Our team will visit site, will have detailed walk through at your plant site & will suggest where to install Speed breakers, road studs, traffic Signage's, convex mirrors, road crossing marks & Signage's.

Fit Testing

Quantitative Fit Test:

- Fit tests are performed to check the fit of masks on different face sizes and contours as per guidelines mentioned in the standard.
- Quantitative fit testing program with Porta count, TSI USA.
- Quantitative fit testing program with pressure sensor equipment^L_{SEP}OHD, USA.

Qualitative Fit Test:

- Irritant smoke is the only OSHA-accepted qualitative fit testing method that does not rely on the test subject's subjective response.
- Other types of qualitative fit tests, such as banana oil (Isogamy acetate), saccharin, or Bitrex, may cause false negative results.
- Use for testing respirators with P100 or FFP3 class respirators

Height Safety

Work at height is work in any place, including a place at, above or below ground level, where a person could be injured if they fell from that place.

Access and egress to a place of work can also be work at height. Carry out risk assessments for work at height activities and make sure that all is Planned, Organized and carried out by a competent person. Follow the General Principles of Prevention for managing risks from work at height - take steps to avoid, prevent or reduce risks, choose the right work equipment and select collective measures to prevent falls (such as guard rails and working platforms) before other measures which may only reduce the distance and consequences of a fall (such as nets or air bags) or may only provide fall-arrest through personal protection equipment.

Safety Shower

Regular maintenance is essential to ensure correct functionality. A weekly activation must be performed and recorded to ensure a full history is maintained as per standard requirements. All equipment should be visually inspected and activated at least once a week to ensure it is operating properly, to clear the line of any sediment build up and check that the water runs clear. Refer to the product Installation and Operation manual for advice on regular cleaning of your safety showers and eye washes. Shower heads, nozzles and diffusers must all be kept clean to prevent build up of debris/bacteria. If you have electrical equipment this must be visually inspected on a regular basis to check for any damage.

Lockout Tagout

We conduct a detailed survey of your factory as per OSHA Standard / guidelines to identify various Energy Sources / Related Hazards. A report will be given appraising the isolation methods and suitable devices to protect workers from harm. Recommendations will be given to necessary change in your facility if required. Training: - We provide LOTO Standard & Customized class room and On Job training to all levels of employees. Our certified trainer will conduct trainings through Video, Audio and Demo of our products. We provide training material and certification. Prompt Direction: - We give prompt & Right direction to isolate energy sources. We supports for the installation of Special LOTO products for all its customers

Chemical Hazardous, Hand, Body Protection

The Fall Protection survey recommendations are based upon the application of a risk assessment process to highlight possible injuries that may result as a consequence of work at height issues. In addition, as a part of the survey to understand work practices, risks, hazards and work environment for worker-at-height at the listed locations. In summary, the survey identifies potential hazards, with risk ratings and solution recommendations. Capital Safety recommends a continuous re-evaluation of site hazards in order to ensure the effective management of fall protection and rescue needs, change process and the overall worksite safety and health. You and your organization are a very important part of the Capital Safety mission. We are available to you at any time to discuss any part of the survey, and look forward to assisting you with your body Protection needs.

Light Respiratory Protection FROM DRÄGER

Dräger X-plore® 8000 Powered Air-Purifying Respirator (PAPR)

Challenging workplace conditions demand reliable solutions. The Dräger X-plore® 8000 offers a new level of intuitive handling combined with intelligent electronics that provide the high degree of safety your people need to focus on the task at hand.

D-118978-2013

Intelligent alarm system
Two-step alarm concept with differentiation of risk level

Lithium-ion technology
Operating time between 4 and 20 hours depending on the working conditions and system set-up

IP65 protection
IP65 for optimal protection and easy decontamination

Filter recognition
Advanced sensor technology recognises the correct filter and displays particle filter saturation properly

Hose identification
Automatic adjustment of minimum flow rate for attached headpiece

Dräger PAPR Advantages :

- All hoods have protection Level TH3.
- IP 65 rated.
- Noise level of 64 DB.
- Automatic filter and hose recognition and automatic adjustment of ambient condition.
- Temp class – T4.
- Continuous battery operation for long time.
- User can adjust air flow.
- Cleaning under shower is possible.
- Vibration alarm.
- Easy battery removal.

Dräger Polytron® 7000 Detection of toxic gases and oxygen

The Dräger Polytron® 7000 is a gas detector that can satisfy many toxic and oxygen gas measurement applications on a single platform. It meets the requirements of the compliance market as well as the high specification requirements of customised solutions.

Large Display
34 x 62 mm, 64 x 128 pixel 1.3" x 2.4"

Quick Lock mechanism
One half turn – locked

Simple 3 button operation and navigation
Graphics, icons and real text descriptions

Polytron Docking station
Durable GRP housing

Dräger Alcotest® 5000

Alcohol breath device for mass screening

The Dräger Alcotest® 5000 is a highly reliable breath-alcohol tester that detects the presence of alcohol. This high-speed breathalyzer lets you perform up to 12 tests per minute. Its special non-contact funnel reduces the back-flow of expired air to a minimum, preventing the risk of infection to subsequent test subjects.

Dräger

Dräger Pac® 6500 Single-Gas Detector

The robust Dräger Pac® 6500 is your reliable companion under tough conditions. The personal single-gas detection device measures CO, H₂S, SO₂ or O₂ quickly and precisely. Quick sensor response times and a powerful battery also ensure safety.

Dräger Polytron® 5200 CAT

Detection of flammable gases and vapours

The Dräger Polytron® 5200 CAT is a cost-effective explosion-proof transmitter for the detection of flammable gases in the lower explosion limit (LEL). It uses a catalytic bead DrägerSensor® Ex ... DD that will detect most flammable gases and vapours. A 3-wire 4 to 20 mA analogue output with relays makes it compatible with most control systems.

Dräger

Dräger X-am® 2500 Multi-Gas Detector

The Dräger X-am® 2500 was especially developed for use as personal protection. The 1 to 4 gas detector reliably detects combustible gases and vapours, as well as O₂, CO, H₂S, NO₂ and SO₂. Reliable and fully mature measuring technology, durable sensors and easy handling ensure a high degree of safety with extremely low operating costs.
